That will make my life easier - I think of it as Bozeman and have it labelled as such in my sed/hab site map. Sounds good!

---

I did the opposite. In the Executive Summary of the TMDL document I referred to it as Sourdough Creek (colloquial name) but noted that the map name is Bozeman Creek and it would be referred to as such from that point on in the document.

That alright?

<b>SOURDOUGH CREEK (BOZEMAN CREEK)<sup>b</sup></b> , confluence of Limestone Creek and Bozeman Creek to the mouth (East Gallatin River)	<i>Escherichia coli</i>	Pathogens	PRIMARY CONTACT RECREATION
	Total Phosphorus	Nutrients	AQUATIC LIFE COLD WATER FISHERY PRIMARY CONTACT RECREATION
	Sediment	Sediment	AQUATIC LIFE COLD WATER FISHERY
	Total Nitrogen	Nutrients	AQUATIC LIFE COLD WATER FISHERY PRIMARY CONTACT RECREATION
<b>STONE CREEK</b> , headwaters to mouth (Bridger Creek)	Sediment	Sediment	AQUATIC LIFE COLD WATER FISHERY
<b>THOMPSON CREEK (Thompson Spring)</b> , headwaters to mouth (East Gallatin River)	Total Nitrogen	Nutrients	AQUATIC LIFE COLD WATER FISHERY PRIMARY CONTACT RECREATION
	Sediment	Sediment	AQUATIC LIFE COLD WATER FISHERY

<sup>a</sup> All Cold Water Fishery and Warm Water Fishery impairments will be combined with Aquatic Life

use impairment, starting with the 2012 IR (i.e., only “Aquatic Life” will appear in the IR).

<sup>b</sup> Sourdough Creek is identified on the high resolution National Hydrography Dataset (NHD) as Bozeman Creek and will be referred to as Bozeman Creek henceforth.

Do you typically refer to the listed stream as Sourdough or Bozeman creek? I was just reading that it's commonly called Bozeman Creek downstream of the USFS boundary but the listed segment is called Sourdough so I was thinking of sticking with that. Anyway, just checking with you so we'll be consistent.
